Coral reefs are threatened ecosystems

Coral disease impacts are widespread

Vega Thurber et al. 2020

Coral Disease Outbreak Risk – CRW’s first disease monitoring tool

Heron et al. (2010) PLoS one

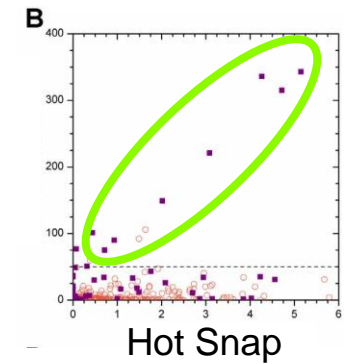

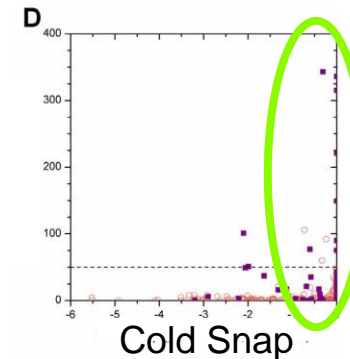

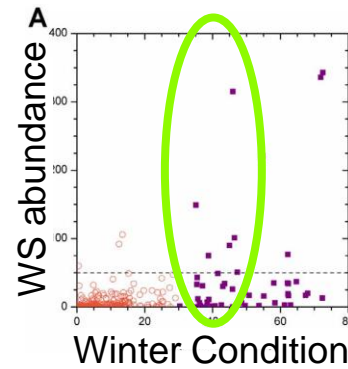

OPEN ACCESS Freely available online

Summer Hot Snaps and Winter Conditions: Modelling White Syndrome Outbreaks on Great Barrier Reef Corals

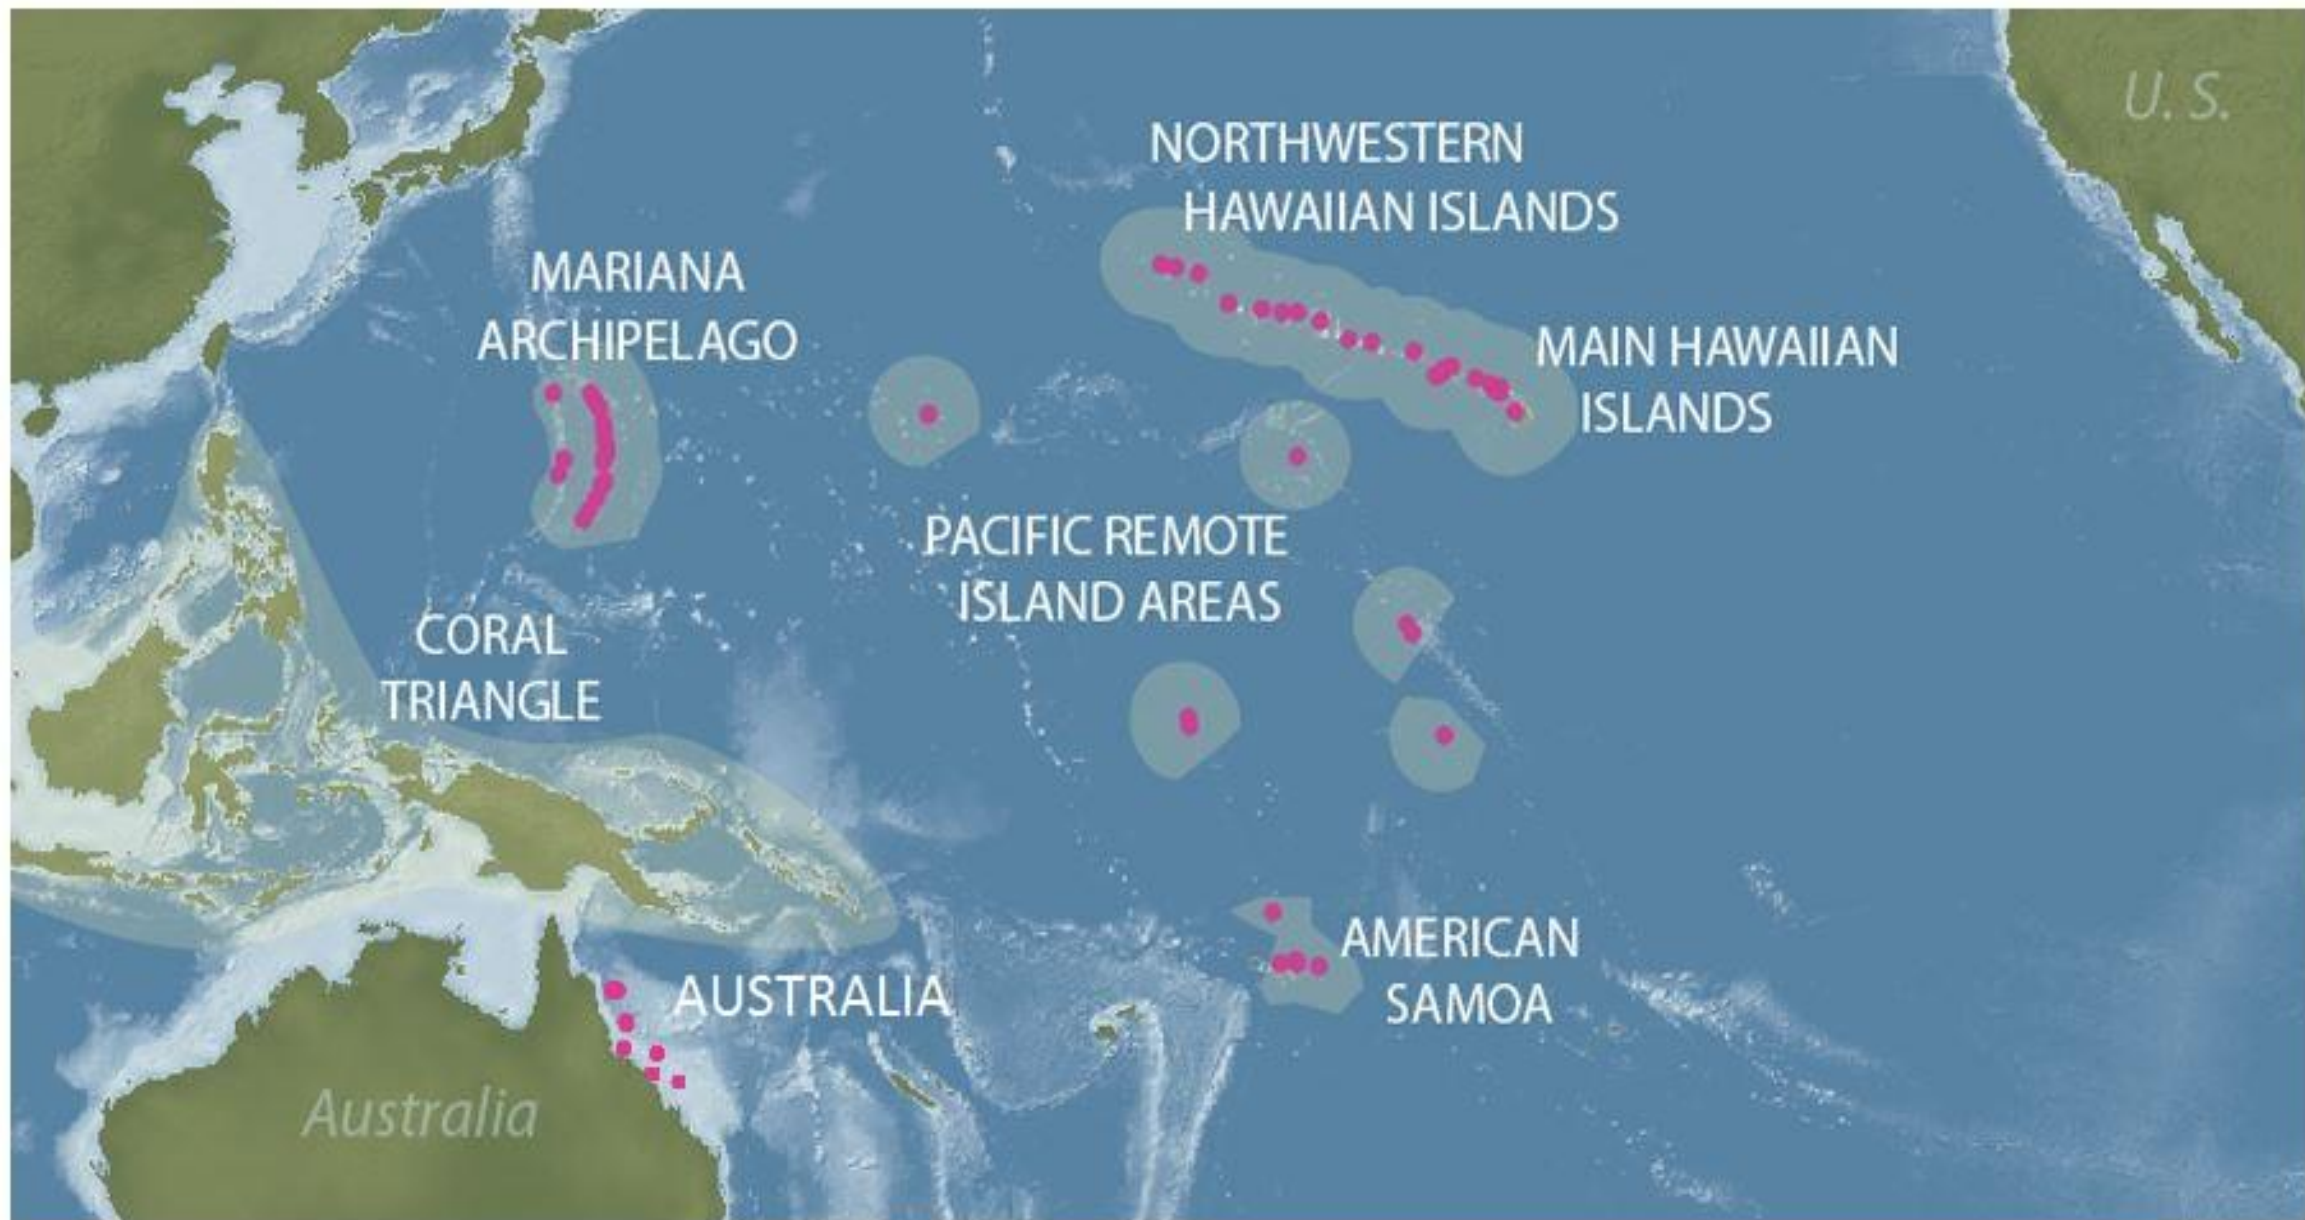

Scott F. Heron^{1,2*}, Bette L. Willis³, William J. Skirving², C. Mark Eakin⁴, Cathie A. Page³, Ian R. Miller⁵

¹ Coral Reef Watch, National Oceanic and Atmospheric Administration, Townsville, Queensland, Australia, ² Physics Department and Marine Geophysical Laboratory, School of Engineering and Physical Sciences, James Cook University, Townsville, Queensland, Australia, ³ School of Marine and Tropical Biology and ARC Centre of Excellence for Coral Reef Studies, James Cook University, Townsville, Queensland, Australia, ⁴ Coral Reef Watch, National Oceanic and Atmospheric Administration, Silver Spring, Maryland, United States of America, ⁵ Long Term Monitoring Program, Australian Institute of Marine Science, Townsville, Queensland, Australia

End-user engagement

Hawaii Coral Disease (HICORDIS)

Prevalence, host density, survey date and location

Tissue loss

Growth anomalies

Photo sources: Eyes of the Reef

Tissue loss

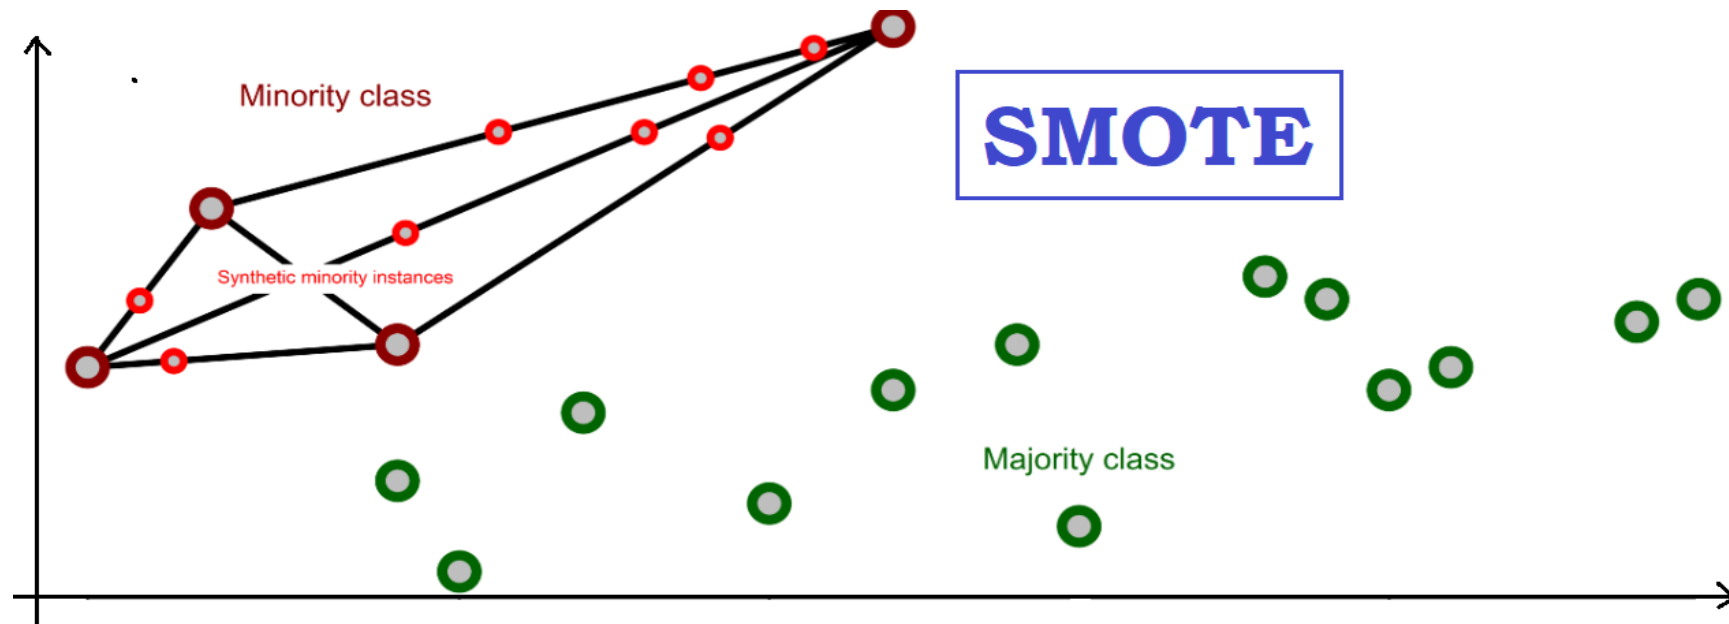

Growth anomalies

Disease	Region	- Dis	+ Dis	% zeros
GA	US Pacific	1415	324	77%
	GBR	34919	1160	97%
WS	US Pacific	1558	169	89%
	GBR	35352	1203	97%

Photo sources: Eyes of the Reef

Synthetic Minority Over-sampling Technique (SMOTE)

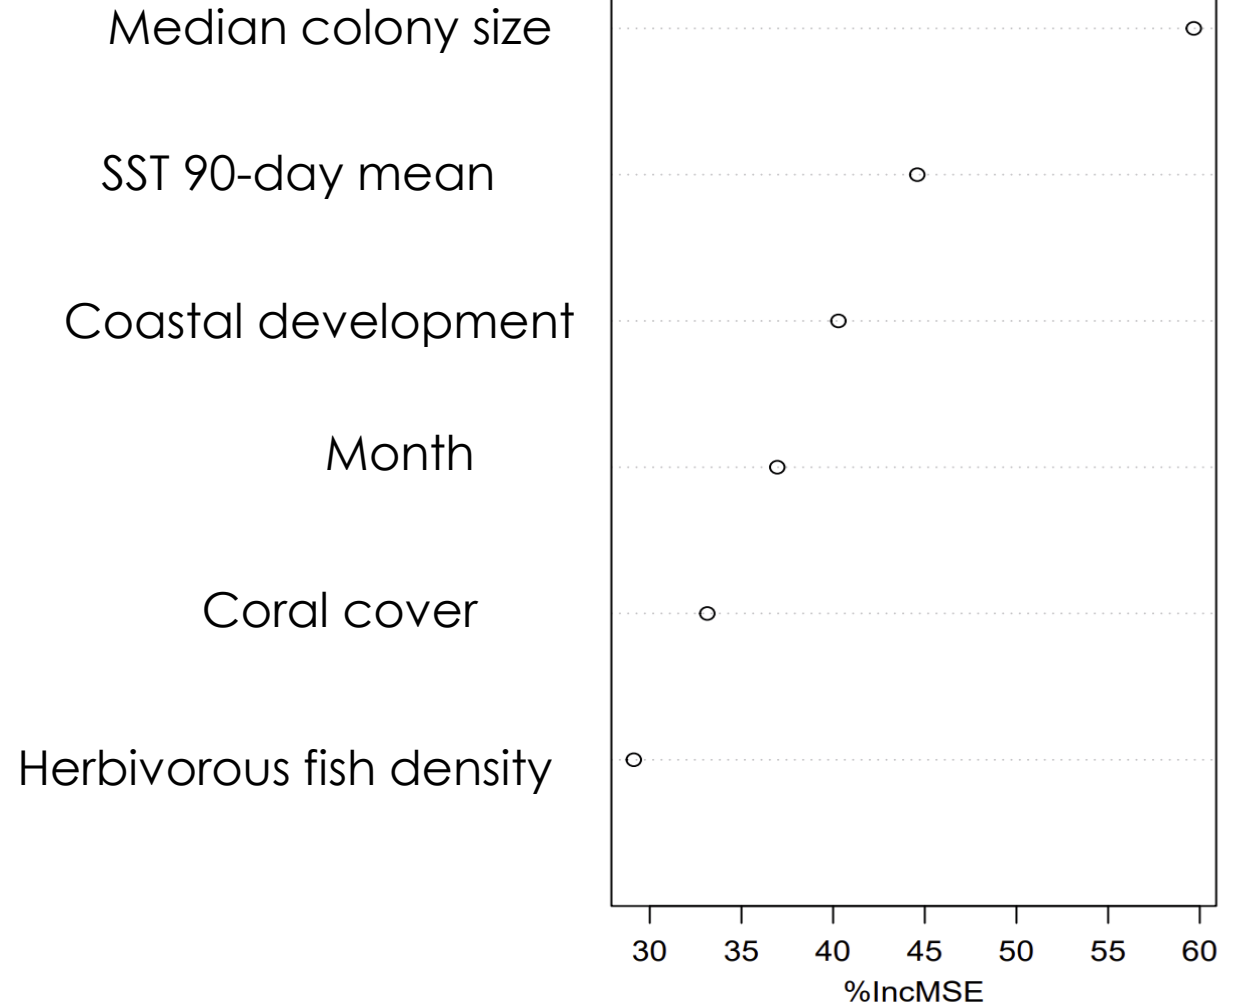

Predictor variables tested in initial models

Disease Region	Growth anomalies GBR	Growth anomalies U.S. Pacific	White syndromes GBR	White syndromes U.S. Pacific
Var 1	Month	Month	Month	Month
Var 2	Coral cover	Coral cover	Coral cover	Coral cover
Var 3	Fish abundance	Herbivorous fish density	Winter condition	Winter condition
Var 4	90-day SST mean	90-day SST mean	Hot snaps	Hot snaps
Var 5	Coastal development	Coastal development	Long term Kd(490) median	Long term Kd(490) median
Var 6	Long term Kd(490) median	Long term Kd(490) median	Long term Kd(490) variability	Long term Kd(490) variability
Var 7	Long term Kd(490) variability	Long term Kd(490) variability	3-week Kd(490) median	3-week Kd(490) median
Var 8	3-week Kd(490) median	3-week Kd(490) median	3-week Kd(490) variability	3-week Kd(490) variability
Var 9	3-week Kd(490) variability	3-week Kd(490) variability	Fish abundance	Herbivorous fish density
Var 10		Median colony size		Parrotfish density
Var 11		Colony size variability		Butterflyfish density
Var 12				Median colony size

Quantile Regression Forests

Modeled disease-region combinations separately
 Model development on 75% of SMOTE dataset

Variable importance

%incMSE = Percent increase in Mean Squared Error

Model accuracy

In sample data validation

Withheld sample data validation

Multi-factor coral disease forecast

Product scope

Regions	<ul style="list-style-type: none">• American Samoa• Guam & CNMI• Great Barrier Reef, Australia• Hawaii• Pacific Remote Island Area
Diseases	<ul style="list-style-type: none">• Growth anomalies• White syndromes
Spatial scales	<ul style="list-style-type: none">• 5 km• Management zones
Time scale	<ul style="list-style-type: none">• 6 months of weekly predictions:<ul style="list-style-type: none">• Predictions for 3 months prior to current date• Forecasts for 3 months following current date

Forecasting

“Static” Variables

- Coral Size and Cover
- Fish Density

Seasonal Variables

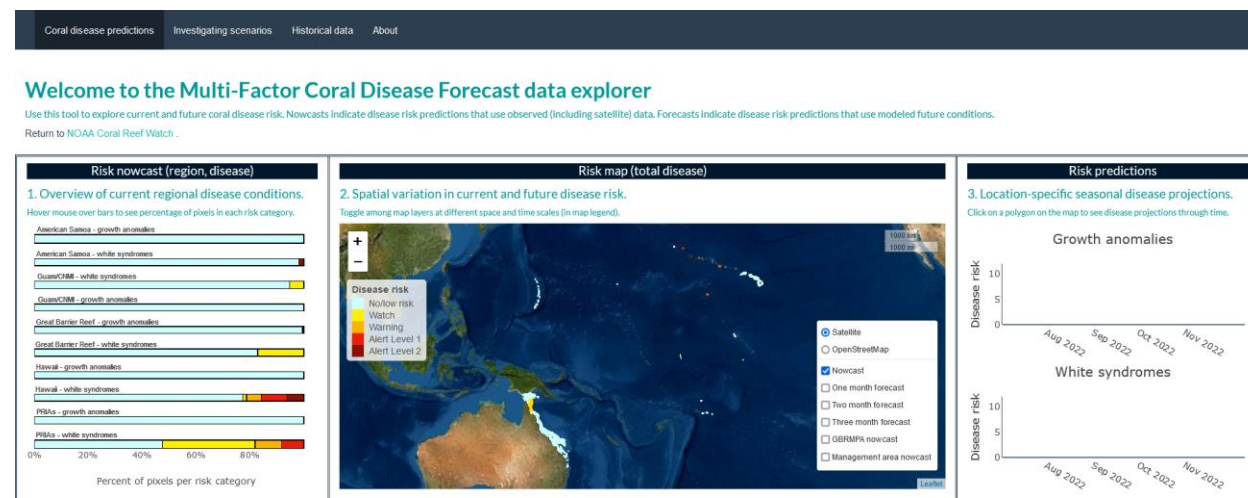

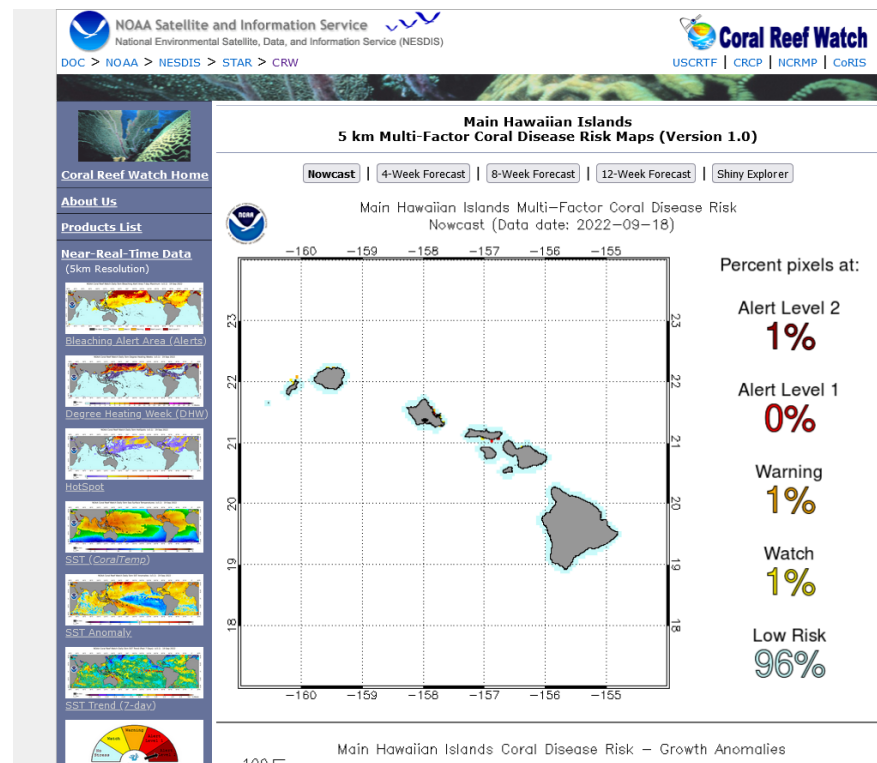

- Ocean Color Climatologies

Forecast Variables

Weekly updates

1, 2, 3 mos forecast

- Temperature Anomalies calculated from CFS forecast of SST

Overview of new product

Multi-factor coral disease forecast

Product scope
