Winter: More than meets the eye

Snow loss in a warming world

Addressing UN Sustainable Development Goals

SDG 15 – ‘Life on Land’

Proportion of important sites for terrestrial biodiversity that are covered by protected areas (15.1.2)

Assessing protect areas coverage for important winter biodiversity

Our Questions

Can we develop ecologically-relevant metrics to capture snow cover dynamics using existing remotely sensed data?

Does information on winter climate and snow improve distribution modelling of vertebrate communities?

Are we doing a good job of protecting winter biodiversity “hotspots”?

Winter Habitat Indices

Snow – optical multispectral sensors

Satellite/Sensor	Spatial Resolution	Imaging Frequency	Data Record
MODIS*	500m	Daily	2000-On
Landsat (all sensors)	30m	16 days	1985-On
Landsat 8	30m	16 days	2013-On
Sentinel 2	10-30m	5 days	2017-On
Harmonized L8-S2	30m	2-3 days	2017-On

*Data from both MODIS sensors (Aqua & Terra) begin in 2002

Frozen ground – microwave sensors

Data Product	Spatial Resolution	Image Frequency	Data Record
MEaSURES Freeze/Thaw	6-25km**	Daily	1979-2018*

**6 km data only available for the Northern Hemi from 2002-2018

Remote Sensing of Environment

journal homepage: www.elsevier.com/locate/rse

Characterizing global patterns of frozen ground with and without snow cover using microwave and MODIS satellite data products

Likai Zhu^{a,*}, Volker C. Radeloff^a, Anthony R. Ives^b

Snow Season Length

days between first & last snow

Days

Snow Cover Variability

Example Time-Series:

	no snow	no snow	snow	snow	snow	no snow	no snow	snow	snow	no snow	
State	0	0	1	1	1	0	0	1	1	0	= 10 total obs
Abs(Change)		0	1	0	0	1	0	1	0	1	= 4 change events
											SCV = 40%

Freq. of Change (%)

$$\frac{\# \text{ of Change Events}}{\text{Total \# of Observations}}$$

Frozen Ground without Snow

of frozen ground w/o snow days ÷ total # frozen days

% of frozen season

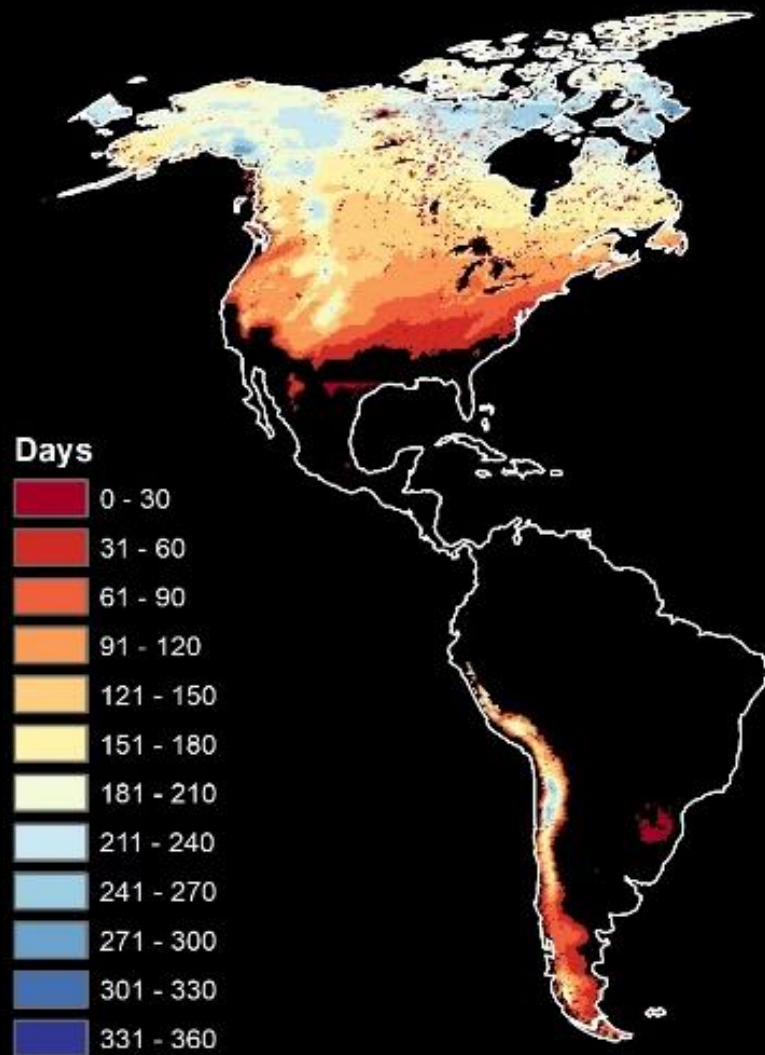

Winter Vertebrate Data Sources

Data Source	Occurrence/ Abundance	Spatial Extent/Resolution	Temporal Extent/Resolution	Taxa Included
eBird	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/>	Global/3 km neighborhoods	2004-2020/Weekly	
Furbearer Harvest Database	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/>	U.S. Wide/Varying Spatial Units	1900-2020/Annual	
IUCN Range Maps	<input checked="" type="checkbox"/> <input type="checkbox"/>	Global/~110 km	NA
